Maximizing the impact of Information Technology and Communication in Education

Project Description

This Technical Cooperation will assess the potential of Information, Technology, and Communication (ICT) to improve student outcomes and managerial efficiency in education. Additionally, it will provide estimates of infrastructure requirements needed for a full set of ICT interventions to work properly to support the education process both at the school level and beyond. This Technical Cooperation will improve the existing knowledge on the impact of ICT on education by assessing combination of complementary interventions.

Investment Description

- Inter-American Development Bank (IADB)

The budget for the Technical Cooperation is US$625,000. Of this total, US$500,000 will be financed by the IADB's Japanese Special Fund and US$125,000 will be local country counterpart financing.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
