Enhancing the Efficient and Equitable Governance of Public Expenditure in Honduras

Project Description

According to the IADB, the objective is to strengthen the institutional capacities of the Ministry of Finance and other related institutions to promote the quality and efficiency of public spending. Through this effort, it will contribute to improving public expenditure execution processes, as well as consolidating macroeconomic and fiscal frameworks that ensure greater predictability and discipline in the use of resources. Additionally, it aims to help close the gaps that have limited the impact of public spending on economic and social development, recognizing the need to strengthen the link between fiscal policy and the creation of enabling conditions for better overall business performance, especially for MSMEs

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
