Support the strengthening of maternal health in Chiapas through fostering demand and accessibility to quality health services

Project Description

The general objective of this Technical Cooperation (TC) is to contribute to the reduction of maternal mortality and morbidity in the State of Chiapas, by promoting healthy practices, generating demand and accessibility to quality health services across Chiapas' public health network. The specific objective is to improve access to quality care for maternal and child health through i) promoting sexual and reproductive health education, among indigenous and vulnerable populations; ii) incentivizing demand for quality maternal health services; iii) building and strengthening institutional capacity for improving quality of care through developing protocols, better information systems and strengthening health management capacity.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
