## Project Description

According to the IADB, the general objective of this Technical Cooperation (TC) is to strengthen the institutional capacities of state governments in Mexico (subnational level) to promote a more favorable business environment through enhanced regulatory systems and digital capabilities. To achieve this, the TC focuses on three specific objectives: (i) supporting the implementation of the Virtual Document Manager (VDM) by integrating state procedures that consume data generated by state or national institutions; (ii) initiating the integration of procedures managed by municipal entities, laying the groundwork for the vertical integration of the VDM; and (iii) generating common protocols that facilitate the flow and use of data across the three levels of Mexican government.

## ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
