Project Description

According to the IADB, the general objective of this TC is to develop a science-based implementation strategy to restore ecological quality and climate resilience in priority micro-basins. By leveraging the HydroBID suite to create a calibrated hydrological framework, the TC will optimize the integrated performance of NBS and gray infrastructure, providing a scalable, data-driven roadmap for long-term restoration. The specific objectives are: (i) develop a dynamic ecohydrological model to quantify the interactions between grey infrastructure, water quality, and NBS; (ii) establish a 20-year strategic roadmap and governance framework to institutionalize resilient sanitation and circular economy policies; and (iii) create a bankable five-year investment pipeline and operational plan to trigger immediate project execution and private sector participation.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
