Project Description

According to the IADB, the general development objective is to support the Government of Mexico in strengthening the institutional capacities of the Executive Secretariat of the National Public Safety System (SESNSP) through the development, adaptation, and dissemination of improvements in decision-making and the formulation of evidence-based public policies, as well as by supporting the establishment of professionalization initiatives. The specific objectives are (i) to strengthen the institutional capacities of the SESNSP and key actors in the National Public Safety System; (ii) to support the consolidation of the National Public Safety Information System to improve decision-making and prepare for the scaling up of interventions; and (iii) to support, through specialized technical assistance, the implementation of the new national policy for the certification and accreditation of institutions within the SESNSP and their personnel, based on the evaluation and continuous improvement of individual competencies.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
