IADB-PE-L1298

Sustainable and Productive Rural Electrification Program in the Peruvian Amazon

Project Description

According to the IADB, the general objective of this program is to promote sustainable development through access to renewable energy in the Peruvian Amazon. The specific objectives are: (i) to provide access to reliable and environmentally sustainable electricity; and (ii) to improve the management capacity of isolated rural electricity systems.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
