New Technologies to Improve Equity and Efficiency in Teacher Assignment in Peru

Project Description

According to the IADB, the general objective of this project is to strengthen the centralized teacher allocation system in Peru. This TC will finance: (i) assessments and improvements in the mechanisms for teacher assignment, (ii) improvements in the front-end technology used to assign teachers including a) further exploration of behavioral strategies to motivate teachers to work in more disadvantaged schools, b) introduction of changes in the teacher assignment platform to enhance user experience to increase transparency and efficiency in teacher assignment, and c) introduction of new technologies, such as artificial intelligence and machine learning, to improve equity and efficiency in the allocation process and increase teacher satisfaction with their final allocation.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
