COVID-19 and the Migration from Cities to Rural Areas in Peru: Identification of Threats and Opportunities for the Sustainable Use of Natural Capital

Project Description

According to IADB website, the Technical Cooperation will generate knowledge about the economic and social conditions of migrants moving from the city to the rural area as a consequence of COVID-19, identify the impacts and conflicts in the use of natural resources due to internal migration, and propose sustainable strategies for the creation of green jobs that minimize the identified impacts and conflicts. The TC will provide insight into how migration may affect sustainability and climate change operations in preparation or execution in Peru by the IDB, specially operations that support the REDD+ Strategy.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
