### Project Description

Assess the impacts of climate change on the health of the population, as well as integrate climate-related health risks into national planning processes for health services. The study will analyze historical data to determine the correlation between climate-related diseases and climate indicators, and, based on these findings, will make projections under different climate change scenarios and recommendations to consider climate change in national and sub-national planning instruments. Therefore, the operation seeks to strengthen the national health systems, and protect and promote the health of the population to boost its resilience.

#### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
