## Project Description

The three main objectives are to (1) develop a road map for the energy transition to a low carbon sector in Peru in line with the decarbonization long term plan (2050) and the country's low carbon strategies, (2) review and analyze the alternatives for the introduction and promotion of private participation in the development of new nonconventional renewable energy sources into the energy matrix resulting from the energy transition roadmap, and (3) to support the Ministry of Energy and Mines (MINEM) in promoting the creation of a market of certified energy auditors and disseminating the benefits of carrying out energy audits and the implementation of the proposed improvements.

## Investment Description

- Inter-American Development Bank (IADB)

## Contact Information

### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
