Project Description

According to the IADB, the Technical Cooperation (TC) aims to strengthen the institutional, operational and financial foundations of Peru's Adaptive Social Protection (ASP) system, with the objective of advancing toward an anticipatory, scalable, and well-coordinated model in response to climate, economic, and social shocks. To this end, the TC seeks to: (i) conduct an analysis that complements the IDB's ASP system maturity assessment for Peru, identifying gaps in contingent financing, coverage, interoperability, and preparedness and response capacity to shocks; and (ii) propose alternatives to strengthen operational and digital instruments, enhance interoperability, and enable the timely and dynamic identification of vulnerable populations during crises.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
