Project Description

IDB: The overall objective of this Technical Cooperation (TC) is to support the Government of Panama in the implementation of a process of policy reform (PN-L1145), which seeks sustainable development of the energy sector, through: strengthening institutional capacity and sustainable reorientation of subsidies in the sector; diversification of the energy matrix with emphasis on the development of the natural gas industry; institutional consolidation of the Energy Efficiency Program; and strengthening the regulatory and technical capability to provide and operate sustainably in isolated rural systems. The Program is consistent with the Bank's Strategy with Panama 2015-2019 (GN-2838), under the strategic objective of enhancing the logistics services, efficiency, and connectivity of the productive infrastructure

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
