Project Description

The objective of this Technical Cooperation (TC) is to support the transformation of technical training in Panama, through a training program in clean energy, in particular electric mobility (ME) and distributed generation (DG), to be implemented through an itinerant mobile classroom, to promote the country's energy transition with the participation of the private sector. The program will be focused on testing re-training mechanisms in new capacities on ME and DG in people who work in traditional areas of the energy sector, and who, if their skills are not reconverted, could be displaced by the introduction of new technologies related to the energy transition.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
