Investment Amount (USD)	\$ 0.13 million
Project Cost (USD)	\$ 0.13 million

Project Description

According to the IADB, the general objective of this TC is to strengthen the analytical capacity of the Republic of Panama to sustain its fiscal consolidation path. The specific objectives are: (i) to develop a technically sound methodology for measuring and evaluating tax expenditures, including the definition of a benchmark tax system; (ii) to prepare a comprehensive technical study of the structure of the corporate income tax (CIT); and (iii) to develop macroeconomic models--including tools to simulate external shocks and a long-term structural model--that strengthen the Medium-Term Fiscal Framework (MTFF). By the end of the project, the Ministry of Economy and Finance (MEF) is expected to have these methodologies, the CIT study, and the macroeconomic models operational and integrated into its technical work, supporting the fiscal consolidation path of the Republic of Panama. The result of the Technical Cooperation (TC) is to build integrated and permanent institutional capacity within the MEF.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
