Study of Water Resources and Climate Vulnerability of the Patino Aquifer

Early Warning System

Study of Water Resources and Climate Vulnerability of the Patino Aquifer

IADB-PR-T1207

Quick Facts

Countries	Paraguay
Financial Institutions	Inter-American Development Bank (IADB)
Status	Active
Bank Risk Rating	C
Voting Date	2016-08-04
Investment Type(s)	Advisory Services
Investment Amount (USD)	$ 0.90 million
Project Cost (USD)	$ 0.90 million

Project Description

The overall objective is the evaluation of climate vulnerability and susceptibility to contamination of the Patiño Aquifer in different scenarios of climate change. Also, this TC is intended to develop a integrated management plan of the aquifer, based on vulnerability analyzes conducted with a three-dimensional dynamic model of flow and water quality, including an institutional framework for implementation, which allows the government of Paraguay take appropriate measures for the protection and proper management of the aquifer.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
