Enhancing the Quality of Metrology Services to Strengthen Competitiveness and Productivity of the SMEs

Project Description

The objective of the technical cooperation is to support the development of a Metrology Strategy for INTN and improve its capacity to deliver scientific and industrial metrology services. INTN has a key role to play in order to enhance productivity and competitiveness of firms by delivering services focused on achieving greater levels of quality in production processes, efficient use of resources and a reduction in costs.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
