Planning for Universal Access to Sustainable Energy for All in LAC

Early Warning System

Planning for Universal Access to Sustainable Energy for All in LAC

IADB-RG-T2898

Quick Facts

Financial Institutions	Inter-American Development Bank (IADB)
Status	Active
Bank Risk Rating	U
Investment Amount (USD)	$ 0.50 million

Project Description

The objective of this TC is to develop a geospatial based least-cost Universal Electricity Access Plan in at least three provinces in Ecuador and in a demonstration area in Bolivia as a foundation for further country-wide planning. The TC will also help building capacity on energy access planning in at least two countries in the region, and develop a LAC oriented framework to help catalyze further work on expanding more efficient cooking stoves (integral to the United Nations (UN) Sustainable Energy for All (SEforAll) initiative)) and space heating.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
