Voting Date	2017-07-11
Sectors	Finance, Technical Cooperation
Investment Type(s)	Grant
Investment Amount (USD)	\$ 0.60 million
Project Cost (USD)	\$ 0.60 million

Project Description

IDB: The general objective of this Technical Cooperation (TC) is to provide support to LAC countries in fostering IoT adoption by LAC supply chains. The specific objectives are to: (i) examine the current state of the adoption of IoT in LAC supply chains; (ii) identify constraints to supply chain productivity that could be overcome by the adoption of IoT; (iii) revise existing policies related to IoT; and (iv) design a roadmap for the development of a National IoT Strategy, aimed at increasing IoT adoption in both the productive sector and public procedures related to private sector development. Two countries will be selected to implement the activities encompassed in this TC based on IDB strategic dialogue and loan portfolio. The ability to replicate this project in other countries in the Region will be facilitated by, among others, laying out the pillars for the development of public policies in IoT through the design of a roadmap for National IoT Strategies; and having examples and inputs for other countries in the Region of what contents such roadmaps could have.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
