Project Description

This project supports efforts to strengthen conditions for oil, gas and mining development in Latin America and the Caribbean (LAC), through: (i) needs assessment and activity road-mapping for the establishment of new regulatory frameworks in the hydrocarbon sector; and (ii) scoping opportunities to reinforce the legal, institutional, and policy frameworks that underpin the mineral sector. The project -- which will be implemented in Argentina, Guyana, Nicaragua and Peru -- will support the generation of knowledge products and dissemination activities to strengthen the technical capacity of the stakeholders directly responsible for improving sector performance in each country and, more generally, of the decision-makers in LAC countries facing similar challenges.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
