More Rice with Less Emissions and Lower Water Consumption

IADB-RG-T3182

Quick Facts

Financial Institutions	Inter-American Development Bank (IADB)
Status	Approved
Bank Risk Rating	U
Voting Date	2018-04-05
Borrower	Regional
Sectors	Agriculture and Forestry
Investment Type(s)	Grant
Investment Amount (USD)	$ 0.52 million
Project Cost (USD)	$ 0.87 million

Project Description

According to the bank, the objectives of the project are: 1) Evaluate water efficiency resources, yields and GHG's emissions under different strategies of water management. 2) Quantify the cost-benefit ratio of different water resource management treatments. 3) Model of GHG's emissions from different treatments under diverse scenarios of climate and soil. 4) Carry out extension activities on the recommendations arising from the project, and aimed at rice family farmers.

Investment Description

- Inter-American Development Bank (IADB)

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
