Project Description

The objective of this TC is to analyze the statistical frameworks existing in the region, and to carry out a comparative study of the proposals of modern legal frameworks and dissemination and data communication strategies that have been implemented in other countries of the region and the world. This work will be carried out in light of the challenges that technological advances and the consequent appearance of new providers of non-traditional data pose for the ONE. As a result of this research and analysis work, it is expected to identify the areas of opportunity, and offer concrete proposals for models of legal frameworks and a series of recommendations on communication and dissemination of statistical information, which are consistent with the best international practices.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
