Project Description

To enable independent assessments of long-term decarbonization strategies in Latin America and the Caribbean (LAC), this Technical Cooperation (TC) will transfer modelling capacity from accomplished international teams to technical teams in LAC. To disseminate existing knowledge about long-term decarbonization strategies and understand further knowledge needs from government agencies, the private sector, and civil society to make progress in implementing the Paris Agreement, this TC will fund stakeholder engagement workshops. Finally, at the request of government agencies in LAC countries, this TC will fund studies to inform the design of politically-acceptable transition pathways towards carbon neutrality.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
