Project Description

According to the Inter-American Development Bank, the principle objective of the project is to analyse diffferent mechanisms to develop new innovation indicators.

There are five specific objectives:

1. Explore new sources of information to create innovation indicators
2. Propose questions and variables for creative activities to include in surveys
3. Evaluate the current production indicators with respect to the digital economy and propose a basic set of indicators to be used in the region
4. Keep a harmonized database on innovation indicators
5. Collaborate with organisations such as UNESCO.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
