| Investment Amount (USD) | \$ 1.20 million |
| Project Cost (USD) | \$ 1.20 million |

Project Description

According to the bank, the objective of this Technical Cooperation is to support policy action conducive to growth acceleration in the Southern Cone. It targets the effective implementation of policies in countries and sectors where economic potential is being held back by specific and identified bottlenecks. The proposed solutions should be consistent with the overarching pillars of macroeconomic stability and microeconomic efficiency. The Technical Cooperation builds upon previous diagnostic work and existing applied knowledge produced inside and outside the IDB. The Technical Cooperation plays a key role in supporting high-impact operational activities for the Southern Cone Department while supporting a systemic and multi-year approach that should also strengthen dialogue and positioning of the IDB in the region.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
