Project Cost (USD)	$ 1.30 million

Integrating the IDB Sustainable Infrastructure Framework into the planning, design, procurement and

Project Description

According to the bank, the objective of the proposed Technical Cooperation (TC) is to improve the sustainability of infrastructure in Latin and Central America by integrating the IDB Sustainable Infrastructure Framework into the planning, design, procurement and financing process of infrastructure assets with the goal of attracting private sector investment into sustainable infrastructure. The TC will focus on preparing a bankable pipeline of sustainable infrastructure projects and the promotion of private investment in Brazil, Colombia, Mexico and Peru. In addition, and given the importance of expanding the role of the private sector, the proposed TC will also support capacity building for host countries' Public-Private Partnership (PPP) units, to apply the Sustainable infrastructure framework into their value for money assessments, structuring and risk allocation processes.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
