Early Warning System

IADB-RG-T3308

Design and Implementation of a Drought Information System (Monitoring, Prediction, Preparation and I

Quick Facts

Financial Institutions	Inter-American Development Bank (IADB)
Status	Active
Bank Risk Rating	U
Voting Date	2018-11-01
Borrower	Regional
Sectors	Agriculture and Forestry, Hydropower
Investment Type(s)	Grant
Investment Amount (USD)	\$ 0.55 million
Project Cost (USD)	\$ 0.55 million

Project Description

and

According to the bank, the aim of the TC is to build a drought information system for the South of South America (SAS in spanish) with two main objectives: (1) to contribute to the reduction of the economic, social and environmental impacts that droughts have on agricultural production and hydroelectric generation in SAS, and (2) to improve the governance of risk management associated with droughts, contributing to the collective development of national policies.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
