Project Description

The overall objective of the technical cooperation is to provide countries with a set of products and a roadmap to support the implementation of a successful transition to electromobility. The added value of the initiative is to provide a service to the bank's client countries that intend to be early adopters of the technology and capture its benefits, if existent, of a planned and comprehensive implementation of the technology. The specific objectives are: i) to promote the appropriation and generation of knowledge on electromobility; ii) to develop interventions as demonstration pilots in the region and strengthen the decision-making process of investments in the area; and iii) to carry out communication and knowledge dissemination activities with joint products between INE, TSP, ENE, CCS, HUD and other relevant divisions of the bank.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
