Project Description

The general objective of this TC is to strengthen and implement a transport security strategy in a global manner, including components of road safety and physical security and continuity to the actions, studies and guides developed through the CT RG-T3020. Therefore, support the LAC countries for the stabilization and reduction of the number of traffic accidents and their consequences, as well as providing a safe cargo and passenger transport without compromising the quality of the service. The specific objectives are: (i) to contribute to the multisectoral institutional strengthening in security issues in general; (ii) promote the development of safer transport projects in urban, interurban and rural areas; (iii) promote the adoption of better safety standards in public and private service vehicles; and (iv) train people on security issues.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
