IADB-RG-T3405

### Advisory Services to Enhance Infrastructure Resiliency in Private Investments

### **Project Description**

The objective of these Advisory Services (AS) is to support private project developers to identify and implement resiliency infrastructure measures in their investments. The specific objectives are to: (i) develop corporate capacities in project infrastructure sponsors to consider climate change adaptation in their investments; (ii) define project studies to be included in the conception, construction and/or operation of infrastructure; and (iii) disseminate results and knowledge to generate awareness among project sponsors for the replicability of resilient infrastructure.

#### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
