Project Description

The main objective of the project is to strengthen the technical capacity of policy and decision makers in LAC countries to harness the potential impact of new technologies on international trade and investment. Capacity-building activities will increase understanding of trade facilitation best practices, motivate future-oriented thinking to improve upon these interventions through the application of innovative technology, and promote an operational perspective to facilitate implementation of both policy and technology.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
