| Project Cost (USD)      | \$ 1.00 million                        |

---

### Project Description

The objective of this Technical Cooperation (TC) is to carry out pilot exercises to operationalize the concept of sustainability in infrastructure projects financed by the Bank in Latin America and the Caribbean (LAC), in coordination with the partner agencies, executing agencies and corresponding technical teams. Specifically, the sustainability criteria identified in the Sustainable Infrastructure Framework (MIS) will be applied, for which advice will be given to the different project teams, in order to identify opportunities to enhance their sustainability. The process carried out with each project, the changes achieved and the lessons learned will be recorded and disseminated with a view to their use in other future infrastructure projects.

### Contact Information

#### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
