| <b>Project Cost (USD)</b>      | \$ 1.00 million                             |

## Project Description

According to the Bank's website, this project finances technical cooperation to prepare a National Water Security Plan which will include legal and institutional framework for its implementation, a consultation within and among the national institutions with responsibilities regarding water resource management and the necessary resources and instruments for its implementation.

A basin-level water security plan will be piloted in a selected country, including the development of a tailored drought management plan to improve resilience capacity in the project area.

## ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
