Project Description

The objective of this technical cooperation is to contribute to food security in the CAN countries by reducing economic and agricultural losses caused by the pathogen of the Fusarium oxysporum f. sp. cubense R4T (Fusarium R4T) in the musaceae crops (banana and plantain), through the implementation of coordinated actions at the regional and national levels. The specific objectives are to: (i) control the dissemination of the pathogen in areas that have already been affected (Colombia); and (ii) prevent the entry of the pathogen into new territories that have not yet been affected (Peru and Ecuador).

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
