Project Description

According to IADB website, the project aims to create a Regional Tourist Intelligence and Early Warning System (SIRTA, for its Spanish acronym), to facilitate access and disseminate information on tourism supply and demand (current and potential) of the Jesuit Route, identifying key opportunities and trends. SIRTA will also include early warning indicators, as an instrument for risk management, to protect local communities, visitors and investments in the tourism sector in key destinations for the articulation of the Jesuit Route. Risk management is essential to build trust (especially post pandemic) and move towards consolidating the Jesuit Route.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
