## Project Description

The objective of this Technical Cooperation (TC) is to design and develop a regional online system that allows the collection, delivery, reception, verification and validation, publication, and dissemination of information on solid waste management in the Latin America and the Caribbean (LAC) Region. To monitor existing developments, follow trends, detect opportunities for improvement, and allow comparisons, thereby enabling decision-making to be guided for the construction of effective public policies and their adequate funding and governance.

### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
