Project Description

The objective of this TC is to identify pathways for the decarbonization of the heavy industry in Trinidad and Tobago, Mexico, and Brazil. This includes: (i) identification of available and foreseeable technologies in the industrial sectors of beneficiary countries, (ii) guidelines for policy and regulation-making for heavy industry decarbonization, (iii) creation of baselines of emissions, energy matrices, and water consumption parameters from heavy industry in beneficiary countries, and (iv) activities for capacity building and knowledge dissemination. It is expected that these studies could serve as reference for further analysis in other countries of the region.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
