Project Description

The objective of this TC is to coordinate data collection and analysis efforts focused on the management of water and sanitation utilities. In particular, the information targeted by this TC is data on water production and sales, water quality and service indicators, and financial statements, specifically fixed and operating production costs at the utility level. These data, obtained from AquaRating and multiple complementary sources, will provide new insights on water management to OLAS and help describe the current situation in the region in this regard.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
