Early Warning System Regional Integration of the Green Hydrogen Value Chain

IADB-RG-T3995

Project Description

Create a green hydrogen hub for Latin America and the Caribbean (LAC) that addresses the following topics: safety regulation, contract standards and certification of origin; and formulate a proposal for a harmonized certification of green hydrogen, which will include a study of potential certification mechanisms for green hydrogen or one of its associated products, such as ammonia, and a harmonized proposal for a safety regulation for the transport of green hydrogen.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (Spanish).
