Development of Public Investment Profiles for Disaster Risk Reduction

### **Project Description**

The objective of this project is to provide a quantitative simulation and assessment of the extent (e.g., %) of disaster risk can be reduced through ex-ante public investment, using a combination of macroeconomic and engineering perspectives. The outputs of this project will be used for IDB member countries in formulating their financial policies, strategies and plans in disaster risk management and will also serve as a reference for the IDB country strategies.

#### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
