| Project Cost (USD)      | \$ 1.10 million                           |

## Project Description

According to the Bank's website, the main objective of this technical cooperation is to conduct in depth -research and elaborate diagnostic products that serve as input to strengthening and building capacities for the management of fiscal risks associated with climate change mitigation and adaptation to promote and maintain an environmentally and fiscally sustainable energy transition. To achieve this objective, this technical cooperation will focus on the following activities: (i) analysis of fiscal risk associated with stranded assets with emphasis on those related to the energy and extractive sectors; and (ii) strengthening the governance and investment frameworks of public enterprises for climate change mitigation, and (iii) improving knowledge on fiscal regimes of extractive industries to turn them into drivers of a sustainable and effective energy transition.

## Investment Description

## Contact Information

No contact information provided at the time of disclosure.

### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
