IADB-RG-T4270

AmazonBeEco Unlocking an Inclusive Bioeconomy in the PanAmazon

Project Description

According to the IADB, the main objective of this project is to create livelihood opportunities for the local communities while reducing the loss of biodiversity in the Amazon region that has been caused by (i) predatory economic expansion and (ii) the lack of a well-structured alternative regional economic development model based on the wealth of its biodiversity, a "bioeconomy".

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (Spanish).
