Project Description

According to the IADB, the objective of this TC is to continue supporting borrowing member countries in their efforts to improve the effectiveness, efficiency, and transparency of public resources, primarily through knowledge management, fiduciary assessments, and strategic planning. More specifically, this is anticipated to be accomplished by supporting countries in:
1) assessing the level of development of their fiduciary systems, where no information is available, or by updating existing information, where there is a baseline or other relevant information;
2) identifying international and regional good practices, measuring improvements in country fiduciary systems and the related impact through research, market and performance analysis;
3) developing indicators to measure and demonstrate the benefits of using national, subnational or Agency systems in Bank-financed operations; and
4) developing action and strategic plans to help countries better plan, prioritize, improve, and strengthen their technical capacity.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
