Project Cost (USD)	\$ 0.30 million

Project Description

As stated by the IADB, the general objective of this technical cooperation is to produce new evidence that helps understand how the lack of competition and high economic concentration in output and input markets in the region may affect productivity growth, and more broadly, consumer welfare and inequality. The specific objective is to produce studies that will help write the 2025 edition of the Bank's flagship publication, Development in the Americas (DIA), on "Competition and Productivity." The studies funded by this TC will also inform Bank operations, programming and strategy documents, and its policy dialogue with line ministries. In addition to funding these studies, this TC will also fund workshops used to coordinate the writing of the DIA, translation of the DIA, and seminars used to disseminate it.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
