Project Description

According to the IADB, the general objective of this technical cooperation is to promote the Caribbean's digital integration through physical connectivity infrastructure, the development of capacities for the use and adoption of digital infrastructure, and the harmonization of regulatory frameworks for regional digital integration. Additionally, the TC seeks to intervene comprehensively in promoting digital capabilities and regional uses of digital infrastructure and promoting regulation for regional digital integration. In this way, it will encourage not only an increase in the quality of the service but, above all, an integration that favors the exchange of information, the creation of local content, the attraction of investments from different actors in the value chain, and finally, the creation of regional digital hubs.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment.

You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
