## Project Description

As stated by the IADB, the objective of the Technical Cooperation (TC) is to generate knowledge to strengthen the capacities and support programs for the digital transformation of Micro, Small and Medium Enterprises (MSMEs) of public institutions, such as Ministries and agencies of Innovation, Economy, Production or Science and Technology, among others. The specific objectives are: (i) to improve the generation and visualization of Digital Check data through the continuous improvement of the tool and the creation and maintenance of a regional data visualization platform; and (ii) to generate information to improve the capacities of the institutions in charge of the digital transformation programs of MSMEs, such as diagnostic studies on the current state of digital maturity of MSMEs in the region, mapping of best practices of support instruments, pilots and impact evaluations of policies, among others.

### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
