### Project Description

According to the IADB, the objective of this Technical Cooperation (TC) operation is to promote efficient and sustainable management of forest fire risks in the Andean Amazon, adapted to the context of climate change. To achieve this, the aim is to strengthen institutional and local capacities, promote a preventive and anticipatory approach, and support the implementation of regional collaboration initiatives, especially in cross-border events. Additionally, the focus is on closing knowledge gaps and identifying opportunities to foster cooperation mechanisms such as the Amazonian Network for Forest Fire Management (RAMIF).

### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to [MICI@iadb.org](mailto:MICI@iadb.org). You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
