Project Description

According to the IADB, this Technical Cooperation (TC) will support the development of critical knowledge products regarding pricing/tariff schemes for electricity markets to accelerate energy transition and increase green technology adoption in Latin America and Caribbean (LAC) region. To this end, the technical cooperation has three main goals: (i) propose alternatives pricing/tariff schemes for a new paradigm: the entrance of variable renewable energy sources such as solar or wind; (ii) evaluate the feasibility of implementing new pricing models within the regional context; and (iii) analyze the design of new focalized incentive schemes related to the electrification of energy consumption.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
