Project Description

According to the IADB, the objective is to contribute to improve agricultural productivity and climate resilience of small and medium landholder farmers by promoting climate-smart agricultural practices through digital technologies related to weather and soil management. The activities proposed will be implemented in Bolivia, Peru and Colombia, with a focus on gender and diversity with the goal of identifying the best approaches to scaling up access to these digital services.

ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at <http://www.iadb.org/en/mici/mici,1752.html> (in English) or <http://www.iadb.org/es/mici/mici,1752.html> (Spanish).
