IADB-RG-T4550

Developing regional approaches to enhance the provision of weather forecasts and soil health

### **Project Description**

According to the IADB, the objective is to contribute to improve agricultural productivity and climate resilience of small and medium landholder farmers by promoting climate-smart agricultural practices through digital technologies related to weather and soil management. The activities proposed will be implemented in Bolivia, Peru and Colombia, with a focus on gender and diversity with the goal of identifying the best approaches to scaling up access to these digital services.

#### ACCOUNTABILITY MECHANISM OF IADB

The Independent Consultation and Investigation Mechanism (MICI) is the independent complaint mechanism and fact-finding body for people who have been or are likely to be adversely affected by an Inter-American Development Bank (IDB) or Inter-American Investment Corporation (IIC)-funded project. If you submit a complaint to MICI, they may assist you in addressing the problems you raised through a dispute-resolution process with those implementing the project and/or through an investigation to assess whether the IDB or IIC is following its own policies for preventing or mitigating harm to people or the environment. You can submit a complaint by sending an email to MICI@iadb.org. You can learn more about the MICI and how to file a complaint at http://www.iadb.org/en/mici/mici,1752.html (in English) or http://www.iadb.org/es/mici/mici,1752.html (Spanish).
